Transitive Properties

(mathematics), property of a mathematical relation such that if the relation holds between a and b and between b and c, then it also exists between a and c. The equality relation, for example, is transitive because if $a = b$ and $b = c$, then $a = c$. Other transitive relations include greater than ($>$), less than ($<$), greater than or equal to (\geq), and less than or equal to (\leq). something for the ladies
